Stoddard-Dayton
1907
Automobiles
\$1800.00

We have a large number of wealthy
citizens who buy a new Stoddard-
Dayton Car every year. You can profit
by this as we have a few 1907 Model
"P" Stoddard-Dayton touring cars
that have been used on the best roads
of Chicago less than one year.
Having overhauled them, we know
that they are in perfect condition and
will sell them at the above price and
give you the same liberal guarantee
as if you bought a new 1908 Model.
This guarantee is good until October
1, 1908. These cars are fully
equipped, have been repainted and
it is hard to tell them from a new car.
The guarantee is good—ask any one
to whom we have sold a car.

500 Stoddard-Dayton Cars

THROUGH A LAND
OF ENCHANTMENT

STRETCHING AWAY FROM ONE'S
VERY DOORSTEP.

DEAN RUSSELL WAS GUIDE

For Twilight Club on Exploration of
Wonders of Scientific Agriculture
Last Evening—Dean Collins
Also Spoke.

Explorations to tempt the most ad-
venturous; baffling problems which
challenge the great general, the
great economist, and the engineer;
solutions which compel one to mar-
vel at human ingenuity, strategy, and
cunning; sudden forces and battle-
fields calculated to entice the
sympathies and services of the
bold and ablest soldiers of fortune;
and visions of wealth as alluring and
dazzling as those which beset the
gold-seeker, were unfolded by Dean
H. L. Russell of the U. of W. College
of Agriculture as he guided his hear-
ers through a wonderful new empire—
already in the building. This splendid
realm is not located in any far-off
wilderness or on the ruins of any
forgotten civilization. Its domain in-
cludes the barnyard, the unrelieved
swamp, the humble potato patch, and
the fields of waving grain, and the
inspired leader merged them all into
land of enchantment which indis-
cussably beckons back from the great
centers of population even those who
would build skyscrapers, bridge the
sea with railroads, unite oceans, or
harness plant catenae.

Long Neglected Vocation

The trip was a scenic one, profusely
illustrated with stereoscopic views,
and the pilot spoke with the zeal and
enthusiasm of an evangelist. He talked
of agriculture as the first and
most important vocation of man and
the last to come under the enervating
influence of science, but was not about
to demonstrate it at the very outset
that it had already so profited under
that influence as to make the farm
no longer a profitless stamping-ground
for uneducated, but a place of ad-
vantage only for thorough-going stu-
dents and men of high mental caliber.

Soil Fertility

In his exposition of the direct bear-
ing of stock-raising on the fertility
of the soil, he showed why leading
property was assured to Wisconsin
only when extensive wheat-growing
was abandoned and dairying took its
place. Nature values wasted by ex-
posure and leaching, with objectless
son pictures showing the difference
in the crops when care was exercised
and amendments such as karnit and
gypsum were used to conserve these
values; the action of clover and other
legumes in actually increasing fer-
tility by means of the bacteria which
they hold of the nitrogen in the air
and transform it into an organic and
available element; demonstrations of
the importance of soil inoculation by
means of the Janesville soil with alfalfa
which is destined to revolutionize our
methods of agriculture, were some of
the opening topics. Many of the soils
of Wisconsin, he said, contained al-
together too much water—there are 3,
500,000 acres of this unproductive
land in Rock and Walworth counties—a
large part of which may be recovered
by adequate drainage. Direct effect of
adequate drainage in the case of the stiff red clays
of the supposedly worthless outcrop
pine lands in the Lake Superior region
were shown by the doubling of the
crops on the same piece of land, when
tiles which had been 75 to 100 feet
apart, were replaced by ones 40 feet
apart. It was shown how the soil is polluted
by the leaching of its fertility, the
fat globules consisting mostly of hy-
drogen and carbon and depriving the
land of little or no nitrogen, phospho-
rus, and potash. The dairy inter-
ests in this state were shown to be
worth from fifty to sixty million dol-
lars and the speaker predicted that
within a decade Wisconsin would out-
strip New York and take first place
in cheese-production.

New Methods

Methods devised for securing the
valuable elements, buttersfat and man-
ure, so as to minimize the losses and
save the 25 per cent which formerly
went to the bugs in silage-milk—the
cream separator, the baler, the feed
truck, the manure fork, the corn test,
and the test to determine the amount
of moisture in butter (four of the
five invented in Wisconsin and used
the world over) had made possible a
well-defined effort to improve the qual-
ity of animals by selection and elimi-
nation of the unfit. Improvements in
breeding had produced the Holstein
cow owned by W. J. Gillette of River-
dale with a record for one year of
21,432 pounds of milk and 1,217 pounds
of butter fat, as compared with aver-
age yield of 150 pounds, which makes
it the banner animal of the world.
That breeding paid handsomely was
demonstrated by the fact that the
bull-calf of this pedigree sold for
\$8,000. Improved methods in hog-
raising had produced the Berkshire
hog, "Star Mapleshire" which sold
for \$2,500. Diagrams were shown to
demonstrate the fact that 50 per cent
of the stillborn used in the state pro-
duce of such stock and that this error is
annually costing millions of dollars.
The part which the splendid Janes-
ville horses from the McLean and Gal-

Weak Kidneys

Weak Kidneys, surely point to weak kidney
nerves. The kidneys, like the heart and the
lungs, are the great filters of the body.
If they are weak, the blood is not properly
filtered, and the result is a general
debility. Dr. Shoop's Restorative is a
medicine specially prepared to reach these
troublesome organs. To doctor the kidneys alone,
is little. It is a waste of time, and of money as
well.

H. H. BLISS, Business Mgr.

Subscribed and sworn to before me this 2nd day of March, 1908.

JENNIE L. KENDALL, (Notary Public)

My commission expires Feb. 11, 1911.

HARRIMAN'S DREAM

Mr. Harriman has repeated the achievement of C. P. Huntington and now has a line of railways under his control extending from the Pacific to the Atlantic. Even this, however, does not realize that magnificent dream of his of a splendid transcontinental system or systems that would cross the continent east and west and north and south. Such a conception as that is only possible to a man of large imagination, and only a mind of great calibre and a will of gigantic proportions would undertake to realize such a dream. Mr. Harriman has the imagination, the mind, the will, and the only things that stand in his way are his age, his health and public opposition.

The people are unwilling that so much power should be gathered into the hands of any one individual having no direct responsibility to them, even though that individual be a Harriman with all of Harriman's consummate genius. Especially are they opposed to such a colossal among American railroad men, in view of the fact that Mr. Harriman's conception of the government of railroads is autocratic, that he controls in himself the complete authority over every railroad of which he is the head. The system which he controls is not "the Union Pacific system" so much as it is "the Harriman system." There is strength in this, but there is also weakness. Granted that a mighty transcontinental empire, such as Mr. Harriman dreams of should be created, what would become of the system if Mr. Harriman's health should break down or he should die? Would it be possible for a Harriman system to hold together without Harriman?

AN INTERNATIONAL SCAPEGOAT

Several of the older countries of the world have actually reached the point at which they have ceased to blame the United States for every commercial and financial misfortune which has happened to them during the past year. Until recently almost every change in the turn of affairs in Asia and Europe, as well as in Africa and South America, has been conveniently charged up to the United States as the general international scapegoat.

Now, however, it has come to pass that, inasmuch as this country has not actually had the management of the business affairs of the world, excluding her own, it occurs to some people that in the explanation of their misfortunes the United States can, for the time being at least, be left out of account.

At last we may breathe a sigh of relief and be down at night in peace, without fearing that the morning papers will have some fresh blame charged up to us on the part of peoples and governments which have used the United States to exculpate themselves from the consequences of their own acts.

Join Our EXCURSION

TEXAS PANHANDLE

MARCH 17TH

We will run our private car from Janesville to Delhart, Texas, on the afternoon of March 17th. Round trip, \$31.15. Fare refunded to buyers.

Rich soil, fine water, pleasant and healthy climate, good markets, neighbors from your own locality, good railroads, lowest taxes.

We make terms to suit your financial condition. Prices \$15.00 to \$18.00.

If you can make the trip with us, notify Harland E. Kelly, N. W. Mgr. for the SOUTHWESTERN REALTY CO. of Delhart, Texas, at Avalon, Wis., care W. W. Taylor.

The Louisville Courier-Journal says: "The time, the place, and the girl."

How seldom we find them together. "Hah! The combination that we seldom find together is the sun, the shower, and the umbrella." To this might be added the office, the candidate, the election, and the absolute fitness.

Today there are a number of gentlemen crowding all possible power into the automobiles they are running in the hopes of winning some coveted honor. If they spent half the nerve-racking energy in good hard manual labor (think what a cry and wailing would go up).

One magazine writing of health tells of the food and exercise of the prisoners in a jail and says that the simple food and the simple life are what every child needs and what every home should provide. If this be true, why not arrest everyone and put them in jail for their own health's sake?

Rock county promises to have another judge on the Supreme Bench. Mr. Ruger's candidacy has received the endorsement of leading attorneys all over the state and is now on file in the secretary of state's office at Madison.

Now that spring is about to come, why not start a crusade for good walks again? It is easy to promise, but harder for the aldermen to fill their engagements after election than before.

What would be the matter of placing fire alarms in the city schools? Merely as a matter of precaution that is all, not because there is any danger. There was no danger at Collinswood until the fire came.

Governor Davidson is seeking reelection. He means it, too. Thus far Shurtleff Becker, the "Boy Mayor Of Milwaukee," who is a joke, is the only real contestant.

What strange fellows politics will make. Watch the candidates button-holing voters whom they never would have spoken to on any other occasion.

Thos. S. Nolan still looms up as a possibility for Congress that is stronger than ever before. People who know Nolan trust him and endorse his candidacy.

So Janesville is not going to have the pearl button factory and the factory did not move from Muscatine because the town went dry. How reports will get mixed.

Look out for old Winter. He is behind that stone wall with another dose of North Wind and Jack Frost to nip your hopes of an early spring.

The spring primaries are soon to come and then the fates of some of the aspirants for office will be nipped in the bud.

Seek to Improve Manners.

The young women of a Massachusetts town have formed what they call an antirudeness society. The members of the club have bound themselves to ostracize any young man who talks in proper respect and polished manners.

Buy it in Janesville.

TOO LATE TO CLASSIFY

FOR SALE cheap—101 work horse; sound and true worker, also Woodruff new phone white 720.

FOR RENT Pico room house; city and soft water and gas. Inquire at 180 Center Ave.

DETENTION HOSPITAL GETS FIRST PATIENT OF SEASON

John Strota, a cigarmaker employed on N. Main St., found to be afflicted with Varioloid.

John Strota, a cigarmaker employed in a North Main street factory, developed symptoms yesterday which caused his friends to urge him to consult with Health Commissioner W. D. Merrill.

Upon examination, Dr. Merrill pronounced his malady varioloid, a mild form of smallpox, and this diagnosis was confirmed by Dr. Q. O. Sutherland, member of the state board of health, who was called in consultation.

Mr. Strota was removed to the detention hospital which is in charge of Mrs. Fred Shaw and is located at the end of South. Mr. Strota, who is employed on the streetcar line, was advised not to return to his home, in case he intended to continue his work, and secured temporary lodgings up town. The quarters which the patient had occupied were carefully fumigated. It is said that Mr. Strota was at the contagious this week. He came here three months ago from Mineral Point.

J. E. HOUSE

I now occupy the old stand of the Palace of Sweets, 2 Milwaukee St., and now cater to the public with the choicest and best line of home-made candies in the city. Chocolates a specialty, moderate in cost, delicious in flavor. Try them and be convinced.

Hand Made Jewelry

We have just received a large consignment of hand made jewelry in most artistic and rich designs. This jewelry is hand wrought, each piece an individual design, made by Parisian artists, and no two pieces are made alike. We are showing handsome stick pins, brooches, rings, necklaces and watch fobs. In purchasing one of these pieces of jewelry you have the assurance that no one else in the world has a duplicate, making it a piece of intrinsic value.

We are also showing a large stock of exclusive coral and shell cameos.

We make special designs for pendants, necklaces and brooches, and will submit water color drawing for your approval. SEE OUR WINDOWS.

OLIN & OLSON, JEWELERS

17 West Milwaukee St.

Evansville had a photograph taken of his face. It is presented in the hope that some further trace of the dead man's history and story may be secured. The body was interred at Evansville yesterday.

New Combination Works.

"Take cum and honey for colds," is a doctor's advice. The honey will fill the taste of the rum and the rum will kill the remembrance of the grip cold.

Tact and Kindness. Tact is not insincerity. Tact is the self control that lends the gentle-minded to have respect for time, place and the feelings of others. Tactful persons are usually the kindest.

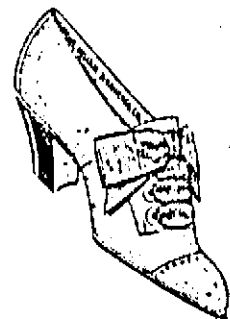

Cutting Off Debate.

"Are you asking for a kiss?" inquired the congressman's sweetheart. "That was my idea." "Then you need not speak any further. You have leave to print."

News From The Suburbs

FULTON.

Fulton, March 9.—Mr. and Mrs. W. N. Lee have been visiting at the home of Mr. and Mrs. H. W. Lee in Janesville.

The Circle Club met at the home of Mr. and Mrs. L. L. Pogo last Friday evening.

John Erickson spent last Saturday in Janesville.

Mr. and Mrs. Jas. Sayre and son Kenneth spent part of last week with Janesville relatives.

Miss Lottie Ehlendorf of Edgerton and Miss Ida Murwin spent a few days this week in Milton and Janesville.

Mrs. G. S. Dodge and daughter, Mrs. Sarah Van Skok have returned from a two weeks' visit with friends in and near Evansville.

J. E. Sayre and O. P. Murwin are getting their lunches ready for summer use.

Mrs. George Sutherland of Janesville spent the latter part of last week at the home of her father, Mr. D. P. Sayre, Sr.

SOUTH FULTON.

South Fulton, March 10.—One of the most enjoyable social events of the season occurred last Saturday evening, March 7, at the home of Mr.

and Mrs. A. T. Pope. A select company of friends and neighbors gathered to add to them in celebrating their twenty-fifth wedding anniversary.

The host and hostess provided a most beautiful and delicious three course dinner which was served by the Misses Mida Hubbard, Florence Darling, Nettie Thompson, and Mary and Elsie Pope.

The dining room was tastefully decorated in national colors. The remainder of the evening was given to social games and music. The bride and groom received a generous shower of rice and a goodly array of silverware was left as reminders of the occasion.

The evening festivities closed by all wishing host and hostess many happy returns of the day.

On Monday evening of last week Mr. and Mrs. Seth Pope entertained about one hundred and twenty of their friends and neighbors. Dancing and cards were the main features of the evening and a good time was reported.

Tobacco stripping is about finished in this locality. Some are resorting, being unwilling to accept the low prices prevailing.

Charles Zellman has moved to Fulton village.

Gray Wadsworth delivered two loads of barley in Janesville on Saturday.

JAP ENVOY TALKS PEACE WITH U. S.

QUESTIONS AT ISSUE ARE SOON TO BE SETTLED.

MIKADO'S INFLUENCE BIG

Ambassador from Insular Nation Declares That His Country Has Grown in Many Ways—Addresses Japan Society.

New York, Mar. 11.—With declarations that there are now between the United States and Japan no questions of any magnitude likely to remain unsettled much longer and that any questions arising in the future will be brought to satisfactory conclusions by the spirit of friendship existing between the two countries, Baron Kogo Takahira, Japanese ambassador, called forth prolonged cheers Tuesday night at the banquet at the Hotel Astor, tendered in his honor by the Japan society of New York.

Ambassador Takahira's address was notable from the fact that it touched upon Japan's enlarged influence "on a small portion of the Asiatic continent" to her treaty with Great Britain, "our honored ally," which was concluded "purely and simply to secure the peace and, therefore, the prosperity of the far east," and to the question of immigration regarding

Ambassador Takahira.

which he declared that he was pleased to be able to say that "while we have to maintain our rights in all respects, there are now between the United States and Japan no questions of any magnitude likely to remain unsettled much longer."

Tribute to New York.

The ambassador at the beginning spoke of the formation of the society which he had the honor to address, and said it showed how friendly and sympathetic the citizens of New York had been towards Japan in the midst of all sorts of unfavorable speculation spread out among a certain section of this great people.

Emperor Large-Minded.

Takahira then upon the question of Japan and Japanese affairs, Mr. Takahira said the emperor is the same person—large-minded and far-sighted, always eager for the happiness and prosperity of his subjects, and at the same time equally sincere in his desire for the well being and good care of all other peoples. Japan's enlarged sphere of influence by no means, the ambassador said, necessitated any change in the general policy of the empire. Japan's aim and purpose as a nation are always the same. In discussing this feature of his talk the ambassador recalled a speech he had made at Philadelphia five years ago on the position of Japan in the far east, and in this connection said:

"I remember I said then, among other things, that 'the sincere desire of the Japanese government and people was to have all neighboring countries realize that mutual interests can best be promoted by the maintenance of peace, the promotion of commerce and industry and the strengthening of the ties of interdependence.'"

Must Be Cultivated.

As the soil, however rich it may be, cannot be productive without culture, so the mind without cultivation can never produce good fruit.

Seneca.

LUNATIC AS BANK THIEF

ATTEMPT MADE TO ROB AN OMAHA INSTITUTION.

Man at First Thought to Be a Desperate Criminal, But Now Believed to Be Insane.

Omaha, Neb., Mar. 11.—A bold attempt was made Tuesday to rob the Merchants' bank at Thirtieth and Farnham streets by a man who, although at first thought to be a desperate criminal, is now believed by the police to be a lunatic.

The man gave his name as L. L. Fee, formerly of Rockford, Ill. He walked into the bank soon after it opened and menacing Vice-President Luther Drake with a bottle which he said contained nitro-glycerin, demanded \$5,000 cash. Mr. Drake, though believing for the moment that his life and those of his fellow officials and employees of the bank might be in imminent danger, conferred calmly with the would-be robber until other officials called the police and the man was taken into custody. Tests by the police seem to show that the contents of the bottle were harmless.

The man entered the bank soon after the doors were thrown open and asked to see Vice-President Luther Drake in his private office.

Drake seated himself opposite the man, who began talking in a rambling manner about having had \$5,000 in the National Bank of Commerce in Kansas City when that bank failed.

"And since all you fellows are in together, you had just better hand me over my money or I'll blow you and this bank and all of us to hell," suddenly said the fellow, producing a three-ounce bottle containing a thick yellow liquid.

SENATOR KILLED IN DUEL.

Louisiana Solon, D. S. Kemp, Slain by a Political Leader.

Amite, La., Mar. 11.—Democratic State Senator Elmer D. S. Kemp was Tuesday night shot and killed by C. E. Hyde, a political and business leader in the community.

The men quarreled over the recent Democratic state primary election, Hyde charging Kemp with untruthfulness. Later Kemp, revolver in hand, met Hyde and slapped his face. The men then agreed to a duel, which took place almost immediately. Hyde was not injured.

The shooting followed a quarrel over the charges made in New Orleans that 3,000 fraudulent votes were cast in the recent state primary to bring about the defeat of J. J. Halley for the nomination of lieutenant governor. Mr. Halley was defeated by Paul Lambremont by a margin of less than 2,000 votes. Several shots were fired and Kemp fell dead, a bullet piercing his heart. Hyde was not wounded and surrendered to the sheriff.

PUTS MOTHER OVER VETERAN.

President Makes Declaration Before Congress in Washington.

Washington, Mar. 11.—The White House was the scene Tuesday of the formal opening of the first international congress on the welfare of the child which is being held under the auspices of the National Mothers' congress. The 200 delegates representing all the states and territories and a dozen or more of the leading countries of the world, were received at the White House when President Roosevelt delivered an address to them in which he declared that he placed the society ahead of the civil war veterans, because he said, in the final analysis it is the mother only who is a better citizen than the soldier who fights for his country.

FORTY-FIVE YEARS FOR MURDER.

Infernal Machine Operator Pleads Guilty to New Charge.

Bellefonte, Ill., Mar. 11.—Joseph Genetti, an Italian miner, pleaded guilty to the murder of Joseph Colonna by an infernal machine and was sentenced to a term of 30 years in the penitentiary. This makes a total of 45 years he must serve. He was sentenced recently to 15 years for the murder of August Genetti, his cousin. Genetti was convicted of placing an infernal machine in August Genetti's tool chest and the two men were killed. An accomplice, Joseph Zadra, was sentenced to a life term two weeks ago. August Genetti's objections to Joseph's attention to his sister are said to have caused the double murder.

Forces Insurance Payment.

Hopkinsville, Ky., Mar. 11.—Circuit Judge Gordon Tuesday handed down a far-reaching decision in a suit against several insurance companies filed by the Imperial Tobacco company, to force payment of policies on \$10,000 worth of tobacco destroyed by night riders in the Princeton raid.

"White Caps" Attack a Home.

Upper Sandusky, O., Mar. 11.—Twenty-five "White Caps" rode into McCutchnville, near here, Tuesday and completely riddled with bullets the home of Constable Peter D. Kiefer. The masked visitors objected to the presence of a negro as a servant.

American Car in Drift.

Cheyenne, Wyo., Mar. 11.—Information received here Wednesday was to the effect that the American car in the New York-to-Paris automobile race was stuck in a snowdrift near Hanna, Wyo., 200 miles west of Laramie.

Buying is going on constantly. People need a thousand and one things every day. Whether they buy of you or not, depends entirely on your efforts to attract attention.

Money-Making Ways of Using Want Ads

To Buy or Sell a Picture or Painting

It is in the easy reach of anybody to have copies of the work of masters—at a trifling price. But the frames cost so much! Here is a suggestion: place a little Want Ad in this paper under the heading, "Pictures and Paintings," stating that you want to Buy or Sell certain pictures. There are many people who get tired of the same pictures in their home if they are of the inexpensive kind, and will be glad to Sell for little money if their attention is called to the fact. Perhaps you have Pictures in your home you would like to Sell, then take the money and get new ones. Many people Buy and Sell expensive Paintings this way—pick up Bargains. It certainly is economical. A Want Ad costs but a few cents—and the price is the same to everybody.

EXAMPLES

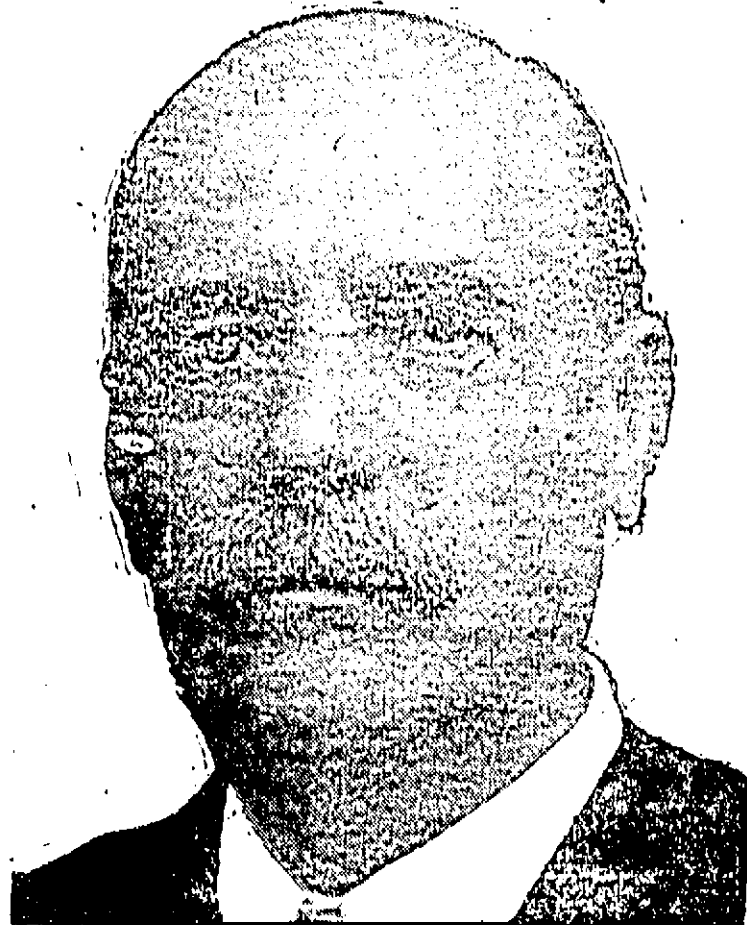

WANT TO BUY REMINGTON COPIES, FRAMED in gold style. Will pay reasonable prices for all latest subjects. Any pictures in your home you want to sell cheap? Address N. J. 24, this office.

HAIR, ORIGINAL, VAN DYKE PAINTING FOR sale to highest bidder. Brought in family for years but never used. Will gladly show. Address P. O. Box 100, this office.

THREE LINES, THREE TIMES, TWENTY-FIVE CENTS.

Our little Want Ads are read EVERYWHERE this paper goes—at the fire-side, the shop, the office, on the farm, in hotels, at libraries and in other cities. What better REASON for YOU to test our Classified page? Inasmuch as it is read by ALL classes of people, you are bound to REACH just the people who will be INTERESTED in YOUR Want Ad.

(Copyright 1908, by George Matthews Adams)

GOV. JOHN FRANKLIN FORT.

Washington, D. C., March 11.—The other day when President Roosevelt entertained John Franklin Fort, of New Jersey at luncheon, the nation began to gossip. They had heard of John Franklin Fort before. They had heard New Jersey suggests his position of vice-presidential dimensions, but when the mighty Theodore broke bread with John Franklin Fort across the White House table official Washington took its first official recognition of this New Jersey governor, and now John Franklin Fort may be said to be an active presidential candidate for the fall of the republican klie.

Less than a year ago Fort was almost wholly unknown as a political factor and sat with dignity and honor on the supreme court bench of New Jersey. Today he is looked upon as a promising candidate for vice-presidential honors in the event of the naming of Secretary Taft or some other westerner for the presidency.

Fort is not particularly popular with the machine element in New Jersey politics and yet he has demonstrated splendid abilities at the head of New Jersey's ship of state. He was elected by a majority that was 42,000 votes less than his predecessor received, and had he not been able to make a name for himself in the "new idea" forces in Essex county of New Jersey, he would probably have been beaten. Perhaps his success is due as much to Senator Colby, the young man who introduced new idea politics in New Jersey three years ago, as to any other force. As a result this Senator Colby is close to the Fort throne and yet the governor is decidedly inclined to run his own office as he sees it. He has violated all sort of precedents in his appointments and he has demonstrated beyond peradventure his listen-

tion to be his own master, regardless of political lines. President Roosevelt referred in favorable terms to Fort's inaugural address in his recent message to congress. This has sent Fort stock up several points in the estimation of "new idea" propagandists, but there has been no throwing up of hats by the "regulars."

Senator Colby was with Fort when he lunched with the president the other day. It is believed that Fort and Colby may undertake a Taft movement in New Jersey, where presidential favor now seems divided between Hughes, Knox and the secretary of war. It is not improbable that in event of such a movement, should success be attained, Governor Fort would more than ever appear on the horizon as a vice-presidential favorite. He is a republican born and bred, and a man of strong personal traits. He is a lawyer by profession and a jurist in inclination.

Warts Have Worth.

Timber warts or burrs, caused by the distortion of the grain out of its natural position, rank high in commercial value because of their rarity and beauty of figure. These freaks of nature have brought as high as ten cents a pound, and a picture is shown of one that was valued at \$200.—Popular Mechanics.

The more you fuss over your advertisement, the more the power the result. It isn't a job to stutter about or to apologize for or to blush at all, or to let it all go to the wind. If you want to make an advertisement hit all you need to do is to talk to the reader of the newspaper as you talk across the counter to a customer.

RETIRED BUSINESS MAN FAVORS NEW THEORY

E. H. Lambert, of Everett, Massachusetts,
Believes Stomach the Seat of Life.

One of the most interesting statements made recently concerning the much discussed Cooper theory, that has spread over the country during the past year, is made by E. H. Lambert, a retired business man, whose home is at 115 Francis Street, Everett, Mass.

Mr. Lambert has this to say in connection with Cooper and his medicine: "Some time ago I read an article about this man Cooper, in which he claimed that stomach trouble was directly responsible for most ill health. He went on to say that, although his medicine did nothing but get the stomach in sound condition, it would, in many cases, remove kidney and liver trouble and various other ailments. He argued from this that the stomach was the main cause of sickness, and stated that the success he has had with his medicine was due entirely to this fact.

"I am now fully convinced that this theory is correct, and believe Cooper has a really remarkable medicine, judging from my own experience.

"I have been a sick man for five

years. Three years ago I was told by a physician that I had Bright's disease of the kidneys. I have treated constantly for this trouble since, without results. After reading the article I have mentioned, I purchased some of this man Cooper's medicine. I have been astounded by what it has done for me. I was relieved to some extent within 24 hours. Today my health is better than for five years, and as far as I can tell, my kidney trouble has disappeared.

"My wife, who had stomach trouble for some time, tried the preparation after noting its action in my case, and her improvement is fully as marked as mine. She now eats heartily three times a day without any distress whatsoever. Her nervousness has also left her. I certainly believe this man's success is fully justified, as he undoubtedly has a wonderful medicine."

We will gladly describe the remarkable record made by the Cooper medicine to all who wish to know of them.

E. H. Lambert.

CAPT. WINSLOW TELLS DEFECTS

EX-AIDE OF CHIEF TESTIFIES BEFORE NAVAL PROBE.

HE HAS MANY CRITICISMS

Assistant Chief of Navigation Bureau
Scores Deficiencies of Several
Points on American Vessels of War.

Washington, Mar. 11.—That there are serious defects in the construction of American battleships was charged Tuesday by Capt. C. M. Winslow, assistant chief of the bureau of navigation of the navy department and Commander A. L. Key, former naval aide to President Roosevelt.

The former officer said the ships under Admiral Evans were all over draft when they left Hampton Roads. He defended Admiral Jellicoe for taking the Russian ships into battle with the Japanese with full bunkers of coal, saying that the Russian commander could not have done otherwise for he did not know how far he would be compelled to steam. Commander Key attempted to direct the form of his own testimony and incurred the displeasure of the committee on that account. He criticized the armor belt and the gun deck as being too low, and the ammunition hoists unsafe. He attempted to dispute the testimony of other officers, especially Chief Constructor Capps, but was not permitted to do so. Finally the committee held an executive session at which it was decided that Key should be heard Wednesday, but that his criticism should be confined to ships and not directed against officers.

Talks of Russian's Fate.
Capt. Winslow, who was the first witness in defending the Russian admiral used the fate of the Russian fleet as an illustration of the danger of going into action with the armor belt too far under water. At the same time he said that the ships would carry at least two-thirds their capacity of coal and full ammunition and stores. He said that two-thirds supply of all stores would make all American battleships too low, and therefore the armor belts should be raised. He could not state the exact amount, as he said it would vary on the different ships. There was no need, said Capt. Winslow, for more than four feet of armor below the water line.

Compares Certain Types.
The witness was asked to compare certain types of American ships with the contemporary class of British ships. He took the Connecticut and the Lord Nelson and in gunnery said the British ship had made better records for rapid shooting with her battery of 9.2 guns than had been made with the Connecticut eight-inch guns. He thought this achievement was due probably to the hoists.

"Theoretically you would feel at a disadvantage if you were compelled to take the Connecticut into action against the Lord Nelson," asked Mr. Tillman.

"I would say the Lord Nelson is the more powerful ship," said the captain. He added that the Michigan and the South Carolina were a great improvement over the Lord Nelson and "possibly superior to anything in the British navy."

"On what ships now under command of Admiral Evans is the armor belt misplaced?" asked Mr. Burrows.

"All of them."

"Misplaced, because it is too low?"

"Because it is too low."

Read Receipts Asked.
Houston, Tex., Mar. 11.—An ancillary bill was filed here Tuesday in the federal court asking a receivership on behalf of the Mercantile Trust company of Boston against the International & Great Northern railroad.

To feel strong, have good appetite and digestion, sleep soundly and enjoy life, use S. S. S. Blood Purifier, the great system tonic and blooder.

Itch! Itch! Itch!—Scratch! Scratch! Scratch! The more you scratch the worse the itch. Try Don's Ointment. It cures piles, eczema, any skin itching. All druggists sell it.

A lazy liver leads to chronic dyspepsia and constipation—weakens the whole system. Don's Regulax (25 cents per box) corrects the liver, tones the stomach, cures constipation.

Cures baby's cramp, William's daily liniment—Dr. Thomas' Electric Oil—the great household remedy.

RHEUMATISM CAN NOT BE RUBBED AWAY

Rubbing with liniments, blistering the affected parts, the application of plasters, and other means of external treatment, are usually helpful in relieving the pains and aches of Rheumatism, but such remedies do not reach the CAUSE of the disease, and are therefore in no sense curative. Rheumatism is due to an excess of uric acid in the blood, brought about by indigestion, poor bowel action, weak kidneys, and a general sluggish condition of the system. The circulation deposits this irritating poison in the different muscles, nerves, tissues and joints of the body, and soon the painful symptoms of Rheumatism are produced. The pains at first may be wandering and slight; but as the blood becomes more fully saturated with the uric acid poison, the disease grows worse and after awhile gets to be chronic. The slight, wandering pains now become sharp and cutting at the least exposure to dampness or night air, or any constitutional irregularity, the bones ache, the muscles are not as free in action as before, and where the acid poison is allowed to remain in the blood the joints often become so clogged with corrosive substances that they are left permanently stiff and useless. Rheumatism can never be rubbed away, nor can it be conquered and driven from the system until the acid-laden blood has been cleaned and purified. No other medicine does this so effectively as S. S. S. It dissolves and removes the impurities and sends a stream of rich, strong blood to the affected parts, which soothes the irritated nerves, inflamed muscles and flesh, and the sufferer obtains relief that is permanent because the real cause of the disease has been removed. Special book on Rheumatism and any medical advice desired free. THE SWIFT SPECIFIC CO., ATLANTA, GA.

THE MYSTERY

By STEWART EDWARD WHITE
And SAMUEL HOPKINS ADAMS

COPYRIGHT, 1907, BY M. CLURE, PHILLIPS & CO.

The effect was electric. We all sprang to our feet and fell to talking at once.

"By God, we're through!" cried Pulz. "I'd clean forgot it!"

The trigger piled on more wood. We drew closer about the fire. All the interests in life, so long held in the background, leaped forward, eager for recognition. We spoke of trivialities almost for the first time since our landing, fused into a temporary but complete good fellowship by the relief.

"Wonder how the old doctor is getting on?" ventured Thrackles after awhile.

"The devil's a preacher! I wonder?" cried Handy Solomon.

"Let's make 'em a call," suggested Pulz.

"Don't believe they'd appreciate the compliment," I laughed. "Better let them make first call. They're the longer established." This was lost on them, of course. But we all felt kindly to one another that evening.

I carried the glow of it with me over until the next morning and was therefore somewhat desisted to meet Captain Selover with clouded brows and an uncertain manner. He quite ignored my greeting.

"Eaten," he squeaked, "can you think of anything more to be done?"

I straightened my back and laughed. "Haven't you worked us hard enough?" I laughed. "Unless you did the cabins I don't see what else there can be to do."

Captain Selover stared me over.

"And you a naval man?" he marvelled. "Don't you see that the only thing that keeps this crew from getting the restless is keeping them busy? I've sweat more with my brain than you have with your back thinking up things to do. I can't see anything ahead, and then we'll have trouble. Oh, they're a sweet lot!"

I whistled, and my crest fell. Here was a new point of view and also a new Captain Ezra. Where was the confidence in the night of his two hands?

He seemed to read my thoughts and went on.

"I don't feel sure here on this case. I don't like a deck where a man has some show. They can scatter. They can hide. It ain't right to put a man ashore alone with such a crew. I'm doing my best, but it ain't going to be good enough. I wish we were safe in Pelice harbor."

He would have murdered me, but I seized his arm and led him out of possible hearing of the men.

"Here, back up!" I said to him sternly. "There's nothing to be scared of. If it comes to a row, there's three of us, and we've got guns. We could even sail the schooner at a pinch and leave them here. You'd stood them off before."

"Not ashore," protested Captain Selover weakly.

"Well, they don't know that. Don't let them see you've lost your nerve this way." He did not even when at the accusation. "Put up a front."

He shook his head. "The sand completely run out of him. Yet I am convinced that if he could have felt the heavy and roll of the deck beneath him he would have faced three times the difficulties he now feared. However, I could see readily enough the wisdom of keeping the men at work."

"You can wreck the Golden Horn," I suggested. "I don't know whether there's anything left worth salvaging, but it'll be something to do."

He clapped me on the shoulder.

"Good!" he cried. "I never thought of it."

"Another thing," said I, "you better give them a day off a week. That can't hurt them, and it'll waste just that much more time."

"All right," agreed Captain Selover.

"Another thing yet. You know I'm not lazy, so it ain't that I'm trying to dodge work. But you'd better lay me off. It'll be so much more for the others."

"That's true," said he.

I could not recognize the man for what I knew him to be. He groined, as one in the dark or as a sea animal taken out of its element and placed on the sands. Courage had given place to fear, decision to wavering and singleness of purpose to a divided council.

He who had so thoroughly dominated the entire ship eagerly accepted advice of me, a man without experience. That evening I sat upon a camp stool, disturbed. I felt that the ground had dropped away beneath my feet. To be sure everything was tranquil at present, but now I understood the source of that tranquillity and how soon it must fall. With opportunity would come more scheming, more speculation, more cupidity. I was to meet it, with none to back me but a scared man, an absorbed man and an indifferent man?

CHAPTER XV.

PERCY DARROW, unexpected, made his first visit to us the very next evening. He came, as I had expected, in a Mexican car, but his carriage between his lips, carrying a lantern, blew the light out and sat down with a careless greeting, as though he had seen us only the day before.

"Hello, boys," said he, "been busy?"

"How are ye, stey?" replied Handy Solomon.

"Good Lord, mates, look at that!"

Our eyes followed the direction of his forefinger. Against the dark sky

We wrecked the Golden Horn. Forward was a rushed out donkey engine, which we took to pieces and put together again. It was no mean job, for all the running parts had to be cleaned smooth and with the exception of a rudimentary knowledge on the part of Pulz and Perdon we were ignorant. In fact we should not have succeeded at all had it not been for Percy Darrow and his lantern. The first evening we took him over to the cliffs edge he laughed aloud.

"Jove, boys, how could you guess it all wrong?" he wondered.

In the evening sometimes we lit a big bonfire.

of the evening sky to northward glowed a faint phosphorescence, arch shaped, from which shot, with pulsating regularity, long shafts of light. They beat almost to the zenith and back again a half dozen times; then the whole illumination disappeared with the suddenness of gas turned out.

"Now, I wonder what that might be?" marveled Thrackles.

"Northern lights," hazarded Pulz. "I've seen them almost like that in the Bering seas."

"Northern lights your eye?" sneered Handy Solomon. "You may have seen them in the Bering seas, but never this far south and in August, and you can kiss the book on that."

"What do you think, sir?" Thrackles inquired of the assistant.

"Devil's fire," replied Percy Darrow briefly. "The islands a little queer. I've noticed it before."

"Devil's fire," repeated the nigger.

Darrow turned directly to him.

"Yes, devil's fire, and devil, too, for all I know, and certainly vampires. Did you ever hear of vampires, doctor?"

"No," growled the nigger.

"Well, they are women, wonderful, beautiful women. A man on a long voyage would just smack his lips to see them. They have shiny gray eyes and lips red as raspberries. When you meet them they will talk with you and go home with you. And then when you're asleep they tear a little hole in your neck with their sharp claws, and they suck the blood with their red lips. When they aren't women they take the shape of big bats like birds."

He turned to me with so beautifully casual an air that I wanted to clap him on the back with the joy of it.

"By the way, Eagon, have you noticed those big bats the last few evenings over by the cliff? I can't make out in the dusk whether they are vampires or just plain bats."

He directed his remarks again to the nigger.

"Next time you see any of those big bats, doctor, just you notice close. If they have just plain black eyes they're all right, but if they have gray eyes, with red rims around 'em, they're vampires. I wish you'd let me know if you do find out. It's interesting."

"Don't get me near no bats," growled the nigger.

"Where's Selover?" inquired Darrow.

"He stays aboard," I hastened to say. "Wants to keep an eye on the ship."

"That's laudable. What have you been doing?"

"We've been cleaning ship. Just finished yesterday evening."

"What next?"

"We were thinking of wrecking the Golden Horn."

"Quite right. Well, if you want my help with your engines or anything of the sort, call me."

He arose and began to light his lantern.

"I hope as how you're getting on well there above, sir?" ventured Handy Solomon impulsively.

"Very well, I thank you," replied Percy Darrow dryly. "Remember those vampires, doctor."

He swung the lantern and departed without further speech. We followed the spark of it until it disappeared in the arroyo.

Behind us belowered the sea. Over against us in the sky was the dull threatening glow of the volcano. About us were mysterious noises of crying birds, barking seals, rustling or rushing whistles. I felt the thronging ghosts of all the old world's superstitions swirling madly behind us in the eddies that twisted the smoke of our fire.

We wrecked the Golden Horn. Forward was a rushed out donkey engine, which we took to pieces and put together again. It was no mean job, for all the running parts had to be cleaned smooth and with the exception of a rudimentary knowledge on the part of Pulz and Perdon we were ignorant. In fact we should not have succeeded at all had it not been for Percy Darrow and his lantern. The first evening we took him over to the cliffs edge he laughed aloud.

"Jove, boys, how could you guess it all wrong?" he wondered.

With a few brief words he set us right, Pulz, Perdon and I listening intently, the others indifferent in the hopelessness of being able to comprehend. Of course we went wrong again in our next day's experiments, but Darrow was down two or three times a week and gradually we edged toward a practical result.

His explanations consumed but a few moments. After they were finished we adjourned to the fire.

This we came gradually to a better acquaintance with the doctor's assistant. In many respects he remained always a puzzle to me. Certainly the man never knew how to take him. He was evidently not only unafraid of them, but genuinely indifferent to them.

Yet he displayed a certain interest in their needs and affairs. His practical knowledge was enormous. I think I have told you of the completeness of his arrangements. Everything had been foreseen from pinpoints to gas lamps. The same quality of concrete speculation showed him what we lacked in our own lives.

There was, as you remember, the matter of Handy Solomon's steel claw. He showed Thrackles a kind of hand-knot that deep sea people had never used. He taught Captain Selover how to make soft soap out of one species of seaweed. He initiated in the art of fishing with a white bone lure. One camp itself he reconstructed on a scientific basis so that we enjoyed less aromatic smoke and more palatable dinner. And all of it he did unselfishly, as though his ideas were almost too obvious to need communication.

Keep your head cool, your feet warm, and your advertising going, and you will be healthy and wealthy.

Martha Washington COMFORT SHOES

Thousands of women thoroughly enjoy the genuine relief and comfort of Martha Washington Comfort Shoes. They fit like a glove and feel as easy as a stocking. No bother about buttons or laces, they just slip on and off at will. Elastic at the sides prevents pinching or squeezing, and gives with every movement of the foot. Absolute comfort guaranteed.

Your dealer will supply you if not, write to us. Look for the name and Trade Mark on the sole.

TRIED? Send the name of a dealer who does not handle Martha Washington Comfort Shoes, and we will send you free, postpaid, a beautiful picture of Martha Washington, size 15x20.

We also make the stylish "Leading Lady Shoes."

F. Mayer Boot & Shoe Company MILWAUKEE, WIS.

"Solid Comfort"

FOUR BLACKS ARE LYNCHED.
Incendiary Fires Lead to Wholesale Hanging Near Biloxi, Miss.

Mobile, Ala., Mar. 11.—Dave Poe, Tom Ranston and two Jenkins brothers, all negroes, were lynched at Van Cleve, Miss., 20 miles north of Biloxi, Miss., by a mob of 30 men. The men were in the custody of Deputy Sheriff Evans of Jackson county en route to jail when the mob took them. A series of incendiary fires of warehouses, causing losses in chancery, foodstuffs and other supplies, incensed the people of the vicinity. The four negroes confessed their guilt when the mob took them from the deputy and all four were hanged to limbs of trees by the side of the road where their bodies were found.

KILLS FOUR AND HIMSELF.
Tenn. (Wash.) Man Slays Wife, Three Children and Takes Poison.

Tenn. Wash., Mar. 11.—Warren McKay, a native of Canada, killed his wife and three children at his home here and then committed suicide. Two men on their way to work Tuesday found McKay's body, clad in his underclothes, on a trail leading to town, about a quarter of a mile from his home. The body was cold and it is believed that he poisoned himself.

Notice of Hearing.
STATE OF WISCONSIN—County Court for Rock County.—In Probate.

Notice is hereby given that at a regular term of the county court to be held in and for said county at the court house, in the city of Janesville, on the 11th day of April, 1908, at 10 o'clock a. m., in the following matter will be heard and considered:

The application of Margaret M. Barlow for the appointment of an administrator of the estate of Robert Barlow late of the town of Harmony, in said county, deceased.

Dated March 10, 1908.

By the Court,
J. W. HALE,
County Judge.

Jeffrey, Mount Smith & Avery,
Attorneys for Petitioner,
Janesville, Wis.

NOTICE TO CREDITORS.—State of Wisconsin, Rock County, Court for Rock County.—In Probate.

Notice is hereby given that at a regular term of the county court to be held in and for said county at the court house, in the city of Janesville, on the 11th day of April, 1908, at 10 o'clock a. m., in the following matter will be heard and considered:

All claims against the estate of John M. Barlow, late of the town of Janesville, in said county, deceased, and all claims in and against the estate of John M. Barlow, late of the town of Janesville, in said county, on or before the 11th day of April, 1908, or before the 11th day of May, 1908, or before the 11th day of June, 1908, or before the 11th day of July, 1908, or before the 11th day of August, 1908, or before the 11th day of September, 1908, or before the 11th day of October, 1908, or before the 11th day of November, 1908, or before the 11th day of December, 1908, or before the 11th day of January, 1909, or before the 11th day of February, 1909, or before the 11th day of March, 1909, or before the 11th day of April, 1909, or before the 11th "PRINCE OF ATHLETES."

Wonderful Record of Lord Desborough, President of Olympic Committee.

Lord Desborough, the president of the Olympic games committee, is known in England as the "prince of athletes," a title earned by long and active association with all branches of sport. He is also all else the great amateur. He was first attracted to the Olympic games because they were designed as the nucleus for the amateurs of the world. Perhaps no man in England has had as remarkable a career in England in the athletic world as Lord Desborough. He began his public athletic career in 1873 as a member of the winning Harrow cricket eleven, and, as he will be one of the competitors at the Olympic horse show in June, his activity extends over a period of thirty-five years.

His most noteworthy performances since 1873 are: Winner of the Harrow

and other races, member of the Oxford variety eight in 1877-8, president of the Oxford University Athletic club and Oxford University Boat club, stroke of the cross channel eight, member of the winning crew of Grand Challenge cup, Henley; amateur punting champion for several years, winner of the Epee prize at the military tournament and member of the English Epee team at Athens in 1904.

Professional swordsmen from Tokyo to Paris have a great share of the spirit of noblesse oblige, and Lord Desborough has done more to advance sword play in England than any other man. While at Oxford he rowed in one of the most famous of all Thames races, the dead heat in the university race in 1877.

While he has no supreme feat to his account he has always lived in first class company in almost every game and sport there is, including politics, and, what is infinitely more to the Britisher, he has done the game and sport good. He is one of the most finished and accomplished athletes in swimming, cricket, rowing, field and track athletics, football, fencing, shooting, tennis and rackets, in addition to being a mountaineer and four-in-hand whip.

Lord Desborough twice swam across the Niagara. He was founder and president of the Bath club and has done much toward promoting the Life Saving society. Some of the rooms at Taplow Court would at first glance give a visitor the suggestion that Lord Desborough was above all else a hunter. There are trophies of many beasts from many lands, but the hall gives something of an epitome of Lord Desborough's athletic progress.

Golfers to invade England.

The Intercollegiate Golf association has planned an invasion of England to take place next summer. It is proposed to send a team of the best college golfers to compete in various English matches. Among those who expect to make the trip are Elin Knowles, Yale, intercollegiate champion; W. T. West, Princeton, runner up in last year's tournament; H. H. Wilder, Harvard, president of the association; W. Follans Morgan, Jr., Harvard; Harry T. Peter, Jr., Princeton, and Robert Abbott, former champion.

TOY SAIL BOAT FREE?

We will give a toy sail boat free to every little boy or girl who will bring their father or mother to the White House and make a purchase this week.

At the March Clearing Sale of Furniture This Week

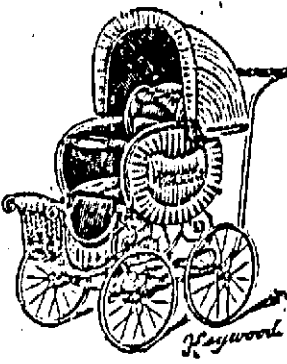

We will close out our entire line of MORRIS CHAIRS at prices never before heard of.

The line is complete and are all of the "Royal Push Button" style, the best Morris Chair made. Every chair is well made and finely finished and of the high class order. We have cut the price on each one and they will run from

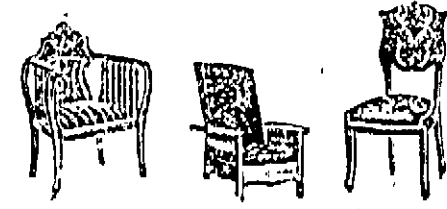

\$9.00 and up.

We have a beautiful quarter-sawn golden oak finish, massive frame and heavy claw foot, regular price \$15.00, now \$9.00. Another much heavier, and better grade cushions, regular \$18.00 chair, at \$12.00. In the line is a very fine Mission Chair, regular price \$20.00, sale price \$14.00. And our best chair, solid mahogany, No. 1 leather cushions, regular price \$30.00, sale price \$22.00.

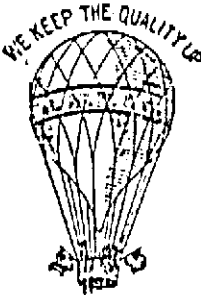

We have about 30 Morris Chairs, all new Christmas, and prices all cut equal to those quoted. If you want a Morris Chair, come now.

Remember our upholstering department is the best ever in the city. All work done promptly, and satisfaction guaranteed. We take orders for new work and make over and re-cover old furniture. We invite all to call and see our upholstering room, also work as we do it. CALL AND SEE OUR GOODS.

W.H. ASHCRAFT, Furniture and Undertaking..

J.M. BOSTWICK & SONS.

THE BIG STORE'S Greatest Remnant Sale

Saturday, March 14th—One Day of Remnant Selling—An Important Event—Great Spring Remnant Sale—Thousands of Remnants.

WE HAVE accumulated an immense line of Remnants in all departments during the last few months and will give you a Remnant Sale next Saturday that you cannot afford to overlook. Women know what a Remnant Sale means at The Big Store.

Be on hand Saturday and get your share of the Bargains. It means a large loss to us now, but a benefit in the long run, as it turns the ends of pieces into money, and strengthens us in the minds of the people because we do even better than we advertise and make the SAVING so GREAT that our sales are looked forward to with much interest.

At One-Half Price is the way we mark remnants. Thousands of remnants of suitings, waistings, skirtings, cloaking, plain, mixtures, fancies, plaids, light and dark, many in liberal lengths, enough for a suit, and all at JUST HALF OF THE REGULAR PRICES.
